

# In acne — 24-hour-a-day skin care with antibacterial pHisoHex® (contains 3% hexachlorophene)

In acne, pHisoHex. antiseptic detergent, provides continuous antibacterial action against the infection factor. With exclusive, frequent use, pHisoHex builds up an effective antibacterial film on the skin that resists rinsing—lasts from wash to wash, pHisoHex augments any other therapy of acne.

When pHisoHex was used for washing by 42 patients with acne, "the results were uniformly encouraging...." "No patient failed to improve." 1

pHisoHex cleans the skin of acne patients better than soap because it is forty per cent more surface active. It is a powerful emulsifier of oil, an action particularly beneficial in acne. Moreover, it cleans the orifices of the sebaceous glands, sweat glands and hair follicles more rapidly and more thoroughly than soap. pHisoHex lacks the potentially harmful qualities of soap. It is nonalkaline, nonirritating and hypoallergenic.<sup>2</sup>

For acne, prescribe pHisoHex—and get improved results.

pHisoAc® Cream dries, peels and masks lesions. Use it with pHisoHex washings to help prevent comedones, pustules and scarring. Contains colloidal sulfur 6 per cent, resorcinol 1.5 per cent and hexachlorophene 0.3 per cent.

pHisoHex is available in unbreakable squeeze bottles of 5 oz. and 1 pint-and in combination package with pHisoAc Cream.

# only 2 seconds to specify maximum

Only 2 seconds are needed to write, "Thyroid Armour" on a prescription: a small investment in time, but one that offers big advantages to your patients. In Thyroid Armour you get maximum quality insured by consistently high standards of preparation. Over 75 years' experience is behind the Armour brand.

#### THYROID U. S. P.

Thyroid Tablets (Armour) are prepared from fresh selected glands, desiccated and standardized by official U.S.P. method to contain 0.2 per cent of iodine in thyroid combination. Thyroid Powder U.S.P. (Armour) is standardized and of uniform potency. USES: Thyroid deficiencies, cretinism, myxedema, nodular goiter (nontoxic), non-nodular goiter a variety of clinical conditions will respond to the use of Thyroid (Armour) when subclinical hypothyroidism is involved. DOSAGE: ½ to 5 grains daily as required by clinical condition. Therapeutic effect develops slowly and lasts for two months or longer. Thus the daily dose may be given as a single dose (preferably in the morning) rather than several times daily. Patients treated with thyroid should be continuously under the physician's observation. CONTRAINDICATIONS: Heart disease and hypertension, unless the metabolic rate is low. SUPPLIED: Tablets—bottles of 100, 1000 and larger; potencies of ¼, ¼, 1, 2 and 5 grains. Powder—1 oz., 4 oz. and 1 lb. bottles.

ENDOCRINE AND PHARMACEUTICAL PRODUCTS OF QUALITY

# An important announcement to physicians who prescribe corticosteroids

Organon's new technical process now makes one of the newer, most highly potent and well tolerated corticosteroids available at greatly reduced cost to your patients with allergic, arthritic or other inflammatory conditions.

This new product is being marketed under the trade name of HEXADROL, brand of dexamethasone 'Organon'. HEXADROL is now being offered to your pharmacist at a price which should make it available to your patients at a cost well within the price range of older generically prescribed corticosteroids. It is supplied as 0.75 mg. white scored tablets, in bottles of 100.

If you have been prescribing the older corticosteroids—such as prednisone, prednisolone, hydrocortisone or cortisone, and have hesitated to prescribe the newer corticosteroids because of economic consideration for your patients, you can now secure all of the clinical advantages of dexamethasone at approximately the same prescription expense. Mg. for mg., HEXADROL is approximately 6 times more potent than triamcinolone or methylprednisolone...8 times more potent than prednisone or prednisolone...28 times more potent than hydrocortisone...and 35 times more potent than cortisone.

If you are now prescribing the newer corticosteroids—such as triamcinolone, betamethasone, paramethasone or another brand of dexamethasone, because of reduced risk of sodium and fluid retention, potassium depletion, or disturbance of glucose metabolism—you can obtain all of these benefits with HEXADROL, at marked savings—yet with complete assurance of unsurpassed quality and therapeutic effect.

For complete information concerning HEXADROL—including indications, dosage, precautions and side effects—or if you would like a trial supply, ask your Organon Representative, or write to: Director, Professional Services, Organon Inc., West Orange, N. J.

'Organon'—your professional assurance of quality Hexadrol®—your patient's assurance of economy!

"Griseofulvin appears to be the most effective drug available for the treatment of fungus

infections of the nails...." Council on Drugs: J.A.M.A. 176:594 (May 20) 1961.

#### in four months, Fulvicin cleared T. rubrum infection of nails and palms

1 March 20, 1961 - therapy with FULVICIN started.

**2** April 19, 1961.

**3** May 19, 1961

When Mr. R. Y. was first seen, three fingernails on his left

hand showed thickening, opacity and brittleness. The patient also had well-defined erythematous plaques on the palms. Cultures of Trichophyton rubrum were obtained from scrapings. The patient was placed on FULVICIN, 250 mg. q.i.d., and a 2% salicylic acid cream. After four months, both nail and palmar involvement had cleared completely and all therapy was discontinued. The patient's hands were free of ringworm when examined one month after completion of the course of therapy with FULVICIN.

SUPPLIED: FULVICIN Tablets (scored), 500 mg., bottles of 20 and 100; 250 mg., bottles of 30, 100 and 500.

#### Emotional control regained...a family restored... thanks to a doctor and 'Thorazine'

During the past seven years, 'Thorazine' has become the treatment of choice for moderate to severe mental and emotional disturbances because it is:

- specific enough to relieve underlying fear and apprehension
- profound enough to control hyperactivity and excitement
- flexible enough so that in severe cases dosage may be raised to two or three times the recommended starting level

Experience in over 14,000,000 Americans

confirms the fact that, in most patients, the potential benefits of 'Thorazine' far outweigh its possible undesirable effects.

Posed by professional models.

Safety through Simplicity

CONSISTENTLY SUCCESSFUL IN RELIEVING DRY, ITCHY SKIN (7)

SARDO IN THE BATH releases millions of microfine water-miscible globules\* which act to (a) lubricate and soften skin, (b) replenish natural emollient oil, (c) prevent excessive evaporation of essential moisture.

Patients appreciate pleasant, convenient SARDO.

Non-sticky, non-sensitizing, economical. Bottles of 4, 8 and 16 oz.

SARDO consists of oils and various esters of specially selected organic acids baving a chain length of c14 and 16 in combination with non-irritating surface active agents to provide colloidal dispersion of the lipophilic phase. Fragrance consists of natural essential oils, isolates, and aromatic chemicals.

for samples and literature, please write...

SARDEAU, INC. 75 East 55th Street, New York 22, N. Y.\*Patent Pending, T.M. © 1961

Native of the East Indies and cultivated in East and the U.S., the Safflower is the source of the most highly unsaturated, cholesterol-free edible oil available anywhere in the world today. Safflower Oil contains more essential linoleates and poly-unsaturated fatty acids per calorie than any other commercially available oil. It is expensive. We use it as an ingredient in HI-SAFF IMITATION ICE CREAM.

HI-SAFF IMITATION ICE CREAM has a pleasing texture and four pleasing flavors-vanilla, chocolate, strawberry, and black walnut. It is an excellent dessert for patients who should avoid butter-fats or hydrogenated oils in their diets.

May we send you, free of charge, certificates good for samples of HI-SAFF? Have your secretary request them by writing: Frozen Desserts Company, 6659 Santa Monica Blvd., Los Angeles 38, Calif.

INGREDIENTS: Water, non-hydrogenated Safflower oil, non-fat milk solids, sugar, corn syrup solids, honey, vegetable stabilizer, vegetable emulsifier, lecithin (soy phosphatides), natural and artificial flavoring and coloring, with oxygen interceptor (anti-oxidant) added to improve stability, Vitamin A (palmitate), and Vitamin D (irradiated ergosterol).

#### SUCCESSFUL FAMILY PLANNING...BASED ON YOUR COUNSEL AND

#### LANESTA GEL

As a physician, you play an essential role in the happiness and well-being of the family. At all timeswhen the young couple is first married, as the children arrive, and even after the family is complete your counsel, including your recommendations for the use of Lanesta Gel, is of major importance.

Lanesta Gel, with or without a diaphragm, is a most effective means of conception control. Lanesta Gel effects speedier spermicidal action because it diffuses rapidly into the seminal clot. In fact, the mean diffusion spermicidal time of Lanesta Gel is three to seven times faster than the mean diffusion times of ten leading, commercially available contraceptive creams, gels, or jellies, according to Gamble ("Spermicidal Times of Commercial Contraceptive Materials - 1959").\*

Lanesta Gel has complete esthetic acceptance and is well tolerated.

40 CALIFORNIA MEDICINE

#### 12th ANNUAL

#### REGIONAL POSTGRADUATE INSTITUTE

#### SACRAMENTO VALLEY COUNTIES

Presented by Loma Linda University School of Medicine, W. F. Norwood, Ph.D., Assistant Dean and Chairman Department of Continuing Education, and California Medical Association Committee on Postgraduate Activities with Sacramento Valley Counties Medical Societies.

Guest Speaker: B. Marden Black, M.D., Professor of Surgery, University of Minnesota, Mayo Foundation.

Feather River Inn - Blairsden

June 21 and 22, 1962

#### **PROGRAM**

#### THURSDAY, JUNE 21

#### Morning Session

9:00-9:30—"How I Do It" Clinic.

9:30-10:15—Approaching the Thyroid Nodule—B. Marden Black, M.D.

10:15-11:00—Exercises, Diets and Drugs in Atherosclerosis—(Calories Don't Count)—John E. Peterson, M.D.

11:15-12:30—Panel Discussions.

Panel 1-Vascular Headaches.

Panel 2—Differential Diagnosis of Peripheral Vascular Disease and Orthopedic Diseases of the Lower Extremities.

#### Afternoon Session

2:00-2:40—Management of the Surgical Patient with Diabetes—Pre and Postoperative—Arthur J. Riesenfeld, M.D.

2:40-3:15—Neck, Shoulder and Arm Pain—Kenneth H. Abbott, M.D.

3:30-4:45—Panel Discussions.

Panel 1—The Unconscious Patient with Abdominal Injuries.

Panel 2—Gynecological Endocrinology.

PANEL 3-Early Diagnosis.

#### FRIDAY, JUNE 22

#### Morning Sessions

8:30-9:30—"How I Do It" Clinic.

9:30-10:15—New Developments in Recognition and Treatment of Hyperthyroidism—B. Marden Black, M.D.

10:15-11:00—Common Fractures, Dislocations and their Management—Alonzo M. Neufeld, M.D.

11:15-12:30—Panel Discussions.

Panel 1-Use and Abuse of Steroids.

PANEL 2—Physical Fitness in the New Frontier.

#### Afternoon Sessions

2:00-2:40-Fetal Distress-Edward H. G. Hon, M.D.

2:40-3:15—Investigation and Management of Obscure Gastrointestinal Bleeding—David B. Hinshaw, M.D.

3:30-4:30-Plenary Session.

HOST: Sacramento County Medical Society . . . GENERAL CHAIRMAN: Sherman DeVine, M.D., . . . PROGRAM CHAIRMAN: John Quinn, M.D. . . . INSTITUTE FEE: \$15.00. For Registration and additional information contact Postgraduate Activities office, California Medical Association, 693 Sutter Street, San Francisco 2. All California Medical Association members and their families are cordially invited to attend.

### the first comprehensive regulator of female cyclic function

# ENOVID

(brand of norethynodrel with ethynylestradiol 3-methyl ether

Simple adjustments of the dosage schedule with this versatile therapeutic agent enable the physician to: control dysfunctional uterine bleeding, regulate an abnormal menstrual cycle, enhance or suspend fertility, advance or postpone the menses, correct endometriosis often without surgery.

The Basic Action. ENOVID (1) induces and maintains a pseudodecidual endometrium, preventing uterine bleeding, (2) inhibits pituitary gonadotropin, preventing ovulation.

When Enovid is withdrawn, bleeding occurs in about three days and usually resembles a normal menstrual period in duration and volume of flow.

Cyclic Enovid Therapy. When Enovid is prescribed for 20 days of each cycle, commencing on day 5, the menstrual cycle will adjust to about 28 days regardless of menstrual timing prior to ENOVID therapy. A few cycles of therapy will frequently restore a normal pattern to women with irregularities as menorrhagia, metrorrhagia or secondary amenorrhea. Since ovulation is inhibited, Enovid may be prescribed cyclically over prolonged periods to suspend fertility. During ENOVID therapy the ovary remains in a state of physiologic rest. After discontinuance of the drug the normal ovulatory pattern returns. Indeed, subsequent pregnancy appears to be enhanced through a probable "rebound" phenomenon. Thus, cyclic Enovid administration has been successful in treating endocrine infertility.

Continuous Enovid Therapy. When Enovid is given on a continuous dosage basis, menstruation as well as ovulation is completely suspended. In endometriosis, continuous Enovid therapy produces a pseudodecidual reaction with subsequent absorption of aberrant endometrial tissue. This often eliminates the need for radical surgery. When surgery is indicated, Enovid is an effective adjunct preoperatively, as well as postoperatively, to prevent recurrence.

Continuous administration of Enovid is also utilized in habitual abortion, providing bal-

anced hormonal support of the endometrium and permitting continuation of pregnancy.

Emergency Enovid Therapy. In high doses, Enovid has a prompt hemostatic effect and will usually control severe dysfunctional uterine bleeding within 6 to 24 hours. Prompt, high-dosage administration of Enovid is also a rational recourse in threatened abortion.

A Note on Safety. The effects of Enovid have been studied in more than 3,500 women during more than 49,500 menstrual cycles, representing 3,800 woman-years of experience. Enovid has been administered cyclically to the same patients for as long as five and one-half years for ovulation inhibition without serious complication. For the present, however, Enovid is not recommended for more than two years, although it is expected that this period will be lengthened as experience continues to accumulate. There has been no impairment of subsequent fertility and no effect on children born to women who conceived after discontinuing Enovid therapy.

The basic dosage of Enovid is 5 mg. daily in cyclic therapy, beginning on day 5 through day 24 (20 daily doses). Higher doses may be used to prevent or to control occasional "spotting" or breakthrough bleeding during Enovid therapy or for rapid effect in the emergency treatment of dysfunctional uterine bleeding or threatened abortion.

Enovid is available in tablets of 5 mg. and of 10 mg. Available on request: literature and references covering more than six years of intensive clinical study.

#### "relief of symptoms is striking with Rautrax-N"

Rautrax-N decreases blood pressure for almost all patients with mild, moderate or severe essential hypertension. Rautrax-N also offers a new sense of relaxation and well-being in hypertension complicated by anxiety and tension. And in essential hypertension with edema and/or congestive heart failure, Rautrax-N achieves diuresis of sodium and chloride with minimal effects on potassium and other electrolytes.

Rautrax-N combines Raudixin (antihypertensive-tranquilizer) with Naturetin c K (antihypertensive-diuretic) for greater antihyper-

tensive effect and greater effectiveness in relief of hypertensive symptoms than produced by either component alone. Rautrax-N is also flexible (may be prescribed in place of Raudixin or Naturetin  $\bar{\mathbf{c}}$  K) and economical (only 1 or 2 tablets for maintenance in most patients).

Supply: Rautrax-N — capsule-shaped tablets providing 50 mg. Raudixin, 4 mg. Naturetin and 400 mg. potassium chloride. Rautrax-N Modified — capsule-shaped tablets providing 50 mg. Raudixin, 2 mg. Naturetin and 400 mg. potassium chloride.

†Hutchison J. C.: Current Therap. Res. 2:487 (Oct.) 1960.

#### cuts healing time in urologic conditions

Acute prostatitis responds very readily to Chymoral alone or with antibiotics, as does acute or chronic epididymitis.<sup>1,2</sup> In instrumentation trauma or TUR surgery, Chymoral reduces the severity of traumatic or postsurgical edema and hematoma, accelerates absorption of blood and lymph effusions, allays pain and promotes a smoother healing.

#### Controls inflammation, curtails swelling, curbs pain

1. Billow, B.W.; Cabodeville, A. M.; Stern, A.; Palm, A.; Robinson, M., and Paley, S. S.: Southwestern Med. 41:286, 1960. 2. Clinical Reports to the Medical Department, Armour Pharmaceutical Company, 1960.

#### **CHYMORAL**

Chymoral is an ORAL anti-inflammatory enzyme tablet specifically formulated for intestinal absorption. Each tablet provides enzymatic activity, equivalent to 50,000 Armour Units, supplied by a purified concentrate which has specific trypsin and chymotrypsin activity in a ratio of approximately six to one. ACTION: Reduces inflammation of all types; reduces and pravents edama except that of cardiac or renal origin; hastens absorption of blood and lymph extravasates; helps to liquefy thick tenacious mucous secretions; improves regional circulation; promotes healing; reduces pain. INDICATIONS: Chymoral is indicated in respiratory conditions such as athma, bronchitis, rhinitis, sinusitis; in accidental frauma to speed absorption of hematoma, bruises, and contusions; in inflammatory dermatoses to ameliorate acute inflammation in conjunction with standard therapies; in gynecologic conditions such as episiotomies, and breast engorgement; in surgical procedures as biposies, hernia repairs, hemorrhoidectomies, mammectomies, phlebitis and thrombophlebitis; in genitourinary disorders as epididymitis, orchitis and prostatitis; in obstatics as episiotomies are formation and alveoletionies. CONTRAINDICATIONS: None known. INCOMPATIBILITIES: None known. Antibiotics as well as generally accepted measures may be coadministered. SIDE EFFECTS: Mild gastric upsets, rarely encountered. DOSAGE: Recommended initial dose is two tablets q.i.d.; one tablet q.i.d. for maintenance. SUPPLIED:

ARMOUR PHARMACEUTICAL COMPANY KANKAKEE, ILLINOIS

Originators of Listica®

# blood pressure approaches normal more readily, more safely....simply

# Salutensin

(hydroflumethiazide, reserpine, protoveratrine A-antihypertensive formulation)

Early, efficient reduction of blood pressure. Only Salutensin combines the advantages of protoveratrine A ("the most physiologic, hemodynamic reversal of hypertension") with the basic benefits of thiazide-rauwolfia therapy. The potentiating/additive effects of these agents<sup>2-8</sup> provide increased antihypertensive control at dosage levels which reduce the incidence and severity of unwanted effects.

Salutensin combines Saluron® (hydroflumethiazide), a more effective 'dry weight' diuretic which produces up to 60% greater excretion of sodium than does chlorothiazide<sup>9</sup>; reserpine, to block excessive pressor responses and relieve anxiety; and protoveratrine A, which relieves arteriolar constriction and reduces peripheral resistance through its action on the blood pressure reflex receptors in the carotid sinus.

Added advantages for long-term or difficult patients. Salutensin will reduce blood pressure (both systolic and diastolic) to normal or nearnormal levels, and maintain it there, in the great majority of cases. Patients on thiazide/rauwolfia therapy often experience further improvement when transferred to Salutensin. Further, therapy with Salutensin is both economical and convenient.

Each Salutensin tablet contains: 50 mg. Saluron® (hydroflumethiazide), 0.125 mg. reserpine, and 0.2 mg. protoveratrine A. See Official Package Circular for complete information on dosage, side effects and precautions.

Supplied: Bottles of 60 scored tablets.

### THE MARCHING CHILDREN

How long would it take 500,000 children to pass through your office?

That's a tremendous army of patients—but it is the number of children under 14 whose lives you and your colleagues have saved since 1935 in just four diseases—tuberculosis, syphilis, influenza and pneumonia. And among working-age victims 2,000,000 are alive today who would not have survived if the 1935 death rate had remained constant.

In the past 25 years, new and potent drugs have played a significant role in reducing mortality from these diseases. Such an achievement results from the combined efforts of many organizations, professions and enterprises...including people working in medical and pharmaceutical research, production, and distribution, who make drug products available to doctors and dentists, hospitals and pharmacies, and to public and voluntary health agencies.

The prescription drug industry is proud of its role in this great work.

THIS MESSAGE IS BROUGHT TO YOU ON BEHALF OF THE PRODUCERS OF PRESCRIPTION DRUGS. PHARMACEUTICAL MANUFACTURERS ASSOCIATION • 1411 K. STREET, N. W., WASHINGTON, D. C.

# Digestant needed?

Cotazym-B provides the most potent pancreatic enzyme action available!

Cotazym-B is a new comprehensive digestant containing bile salts, cellulase and *lipancreatin* for supplementing deficient digestive secretions and helping to restore more normal digestive processes. *Lipancreatin*—"the most potent pancreatic extract available"<sup>3</sup>—is a concentrated pancreatic enzyme preparation developed by Organon.<sup>4</sup> It has been clinically proven to be an effective agent for treating digestive disorders of enzymatic origin.<sup>1,4,5,6,7,8</sup> Cotazym-B is indicated for the symptomatic relief of dyspeptic or functional digestive disturbances characterized by bloating, belching, flatulence and upper abdominal discomfort.

Dosage: 1 or 2 tablets with water just before each meal.

You get these results with help of Fostex

#### Acne lesions clear faster

Fostex is a more complete acne prescription because it contains 6 anti-acne agents . . . not just 1 or 2. These 6 agents, working together, provide essential actions necessary for local treatment of acne.

Fostex degreases, dries and peels and degerms acne skin. It helps remove blackheads, unblock pores, prevent pustules and scar-producing cysts, and rids the skin of bacteria. Fostex is easy to use. Instead of using soap, patients simply wash acne skin with Fostex Cream or Cake 2 to 3 times daily.

Only Fostex contains this unique combination of anti-acne agents: Sebulytic® (3 surface-active agents—sodium lauryl sulfoacetate, sodium alkyl aryl polyether sulfonate, sodium dioctyl sulfosuccinate), plus micropulverized sulfur 2%, salicylic acid 2% and hexachlorophene 1%. Supplied-Fostex Cake, bar form. Fostex Cream, 4.5 oz. jars. Also used as a therapeutic shampoo in dandruff and oily scalp which often accompanies acne.

PARKE-DAVIS

PARKE, DAVIS & COMPANY, Detroit 32, Michigan

"I feel like my old self again!" Thanks to your balanced Deprol therapy, her depression has lifted and her mood has brightened up - while her anxiety and tension have been calmed down. She sleeps better, eats better, and normal drive and interest have replaced her emotional fatigue.

#### Brightens up the mood, brings down tension

Deprol's balanced action avoids "seesaw" effects of energizers and amphetamines. While energizers and amphetamines may stimulate the patient -theyoften aggravate anxiety and tension.

And although amphetamine-barbiturate combinations may counteract excessive stimulation -theyoften deepen depression and emotional fatigue.

These "seesaw" effects are avoided with Deprol. It lifts depression as it calms anxiety - a balanced action that brightens up the mood, brings down tension, and relieves insomnia, anorexia and emotional fatigue.

Acts rapidly - you see improvement in a few days.

Unlike the delayed action of most other antidepres-

sant drugs, which may take two to six weeks to bring results, Deprol relieves the patient quickly often within a few days. Thus, the expense to the patient of long-term drug therapy can be avoided.

Acts safely - no danger of liver or blood damage. Deprol does not cause liver toxicity, anemia, hypotension, psychotic reactions or changes in sexual function - frequently reported with other drugs.

# Deprol'

Dosage: Usual starting dose is 1 tablet q.i.d. When necessary, this may be increased gradually up to 3 tablets q.i.d. With establishment of relief, the dose may be reduced gradually to maintenance levels. Composition: 1 mg. 2-diethylaminoethyl benzilate hydrochloride (benactyzine HCl) and 400 mg. meprobamate. Supplied: Bottles of 50 light-pink, scored tablets. Write for literature and samples.

## gratifying relief for

#### painful joints

With ARISTOCORT, patients with painful, arthritic joints obtain rapid reduction of pain and inflammation, as well as substantial improvement in joint mobility. Many patients who might otherwise be confined in a state of invalidism have been able—with ARISTOCORT—to continue their customary livelihoods or go about their regular household activities.

Yet this gratifying symptomatic relief may not be accompanied by severe hormonal collateral effects, such as sodium retention, edema, emotional disturbance, insomnia or voracious appetite—that may prevent patients from obtaining corticosteroid benefits.

unsurpassed for total patient benefits

# A SEAT BELT CAN SAVE YOUR LIFE!

"Safety belts, properly used, often prevent or reduce injury and death in collisions," says the California Highway Patrol.

Hit by train at a grade crossing, the driver of this car owes his life to a safety belt.

(Official Photo, California Highway Patrol)

#### **INSTALL and USE Seat Belts in Your Automobile**

All C.M.A. members are urged to promote safety in driving by INSTALLING and USING seat belts in their autos, as recommended by the Committee on Traffic Safety.

For your convenience, the Committee on Traffic Safety has arranged with Tulareloft Manufacturing Company for a direct purchase of their #300 Seat Belt. This belt is manufactured in California, and meets the specifications of the California Highway Patrol for use in patrol autos.

The belt is made of heavy nylon webbing, capable of withstanding 6,000 pounds pressure per square inch. The buckle is the metal-to-metal type with an easy-connect and quick-release feature.

Installation instructions should be carefully followed!!!

The price is \$5.95 for standard belts, covers tax and shipping cost. Cadillacs require longer belts—30 cents extra: Sportscar-type anchors—50 cents extra.

Patients sleep soundly with Doriden. More important, they are secure. The wide margin of safety with Doriden is confirmed by more than 5 years of clinical experience and is well-documented in published reports.<sup>1-6</sup>

Clinical evidence clearly supports these advantages of Doriden:

- Side effects (including morning hangover) are seldom significant.
- Toxic effects are rarely a clinical problem.
- Doriden causes little or no respiratory depression.
- Doriden is well-tolerated even by the aged and chronically ill.

Its high degree of safety offers you a good reason to consider Doriden whenever your patient needs a good night's sleep.

# Adult DIP-TET Alhydrox®

**DIPHTHERIA-TETANUS TOXOIDS COMBINED** 

Now, with Adult Dip-Tet, you can extend the good diphtheria and tetanus programs of childhood into adolescence and adulthood, or establish routine primary immunity with far less danger of serious patient reactions. Tests show that under such usage a good antitoxic immunity will be obtained!

Reduction of reactivity in Adult Dip-Tet is achieved through extreme purification of the toxoids (particularly the diphtheria toxoid) which reduces their volume, and through their adsorption on Alhydrox (aluminum hydroxide) which slows absorption. Developed and used by the armed forces since 1955, this type of vaccine is specifically recommended for children over 8 years of age, teenagers and adults.

DIPHTHERIA AND TETANUS PROTECTION FOR ALL YOUR PATIENTS FROM 8 TO 80 WITH FAR LESS DANGER OF SERIOUS REACTIONS
